THE ILT®

2026 GUIDE

Master the markets with the ILT® Indicator.

▸ Read Part 1 and place your first trade in 15 minutes.

Built in 3 parts. You don't need all of it to start.

PART 1 — QUICK START

Set up and read your first signal. **15 minutes.**

PART 2 — THE METHOD

The full ILT® logic, explained once, clearly.

PART 3 — MASTERY

Advanced tools, habits & trading wisdom.

You can trade after Part 1. Come back for Parts 2 & 3 when you want to go deeper. Read it, understand the conditions, apply it properly — and you'll be in the top 5% of traders.

ILT® · ALL RIGHTS RESERVED 2026

Stop guessing. Start reacting.

Most traders guess.The ILT® indicators show you two things automatically, across every timeframe.

🔋 WINDING UP

An asset is loading for a big move when the **GCL resets to a low level** and **Aqua Diamonds** 💎 appear.

🔥 EXHAUSTED

A move is running out when **Fuchsia Diamonds** ♦ appear.

The whole edge: instead of staring at charts hoping, you wait for the setup to come to **you** — and act with confidence on clear, repeatable signals.

ILT® · ALL RIGHTS RESERVED 2026

PART 1 — QUICK START

Set up in 5 minutes.

1. **Log in to TradingView** and open any chart—BTC, a stock, forex, anything.

2. **Add the 3 ILT® indicators** via the *Indicators (fx)* button → *Invite-only scripts*: ILT® V1 2026 · ILT® 2.0 2026 · ILT® Add-on 2026.

3. **Turn Dark Mode ON** (Settings menu) for clean candle & line visibility.

4. **Save it as a template** (toolbar → *Save Indicator template*, name it "A1"). Now you apply all 3 in one click on any chart.

> ✅ **Optional brand look:** in the Add-on settings leave both **PlotCandle** boxes checked, and uncheck **Body / Borders / Wick** in chart settings to match the ILT® 2.0 bar colours.

ILT®

ILT V1

ILT® · ALL RIGHTS RESERVED 2026

Your first signal — just 2 rules.

Start with ILT® V1.This is a complete trade. Everything else just makes it stronger & safer.

▸ TO OPEN

- Aqua Diamonds 💎 appear on the GCL.
- GCL has a **positive slope** & crosses **above** the Cross Line.
- Then: · **LONG if the Colored Line is Aqua**
  · **SHORT if Fuchsia**

▸ TO CLOSE

- Close a **Long** if the Colored Line turns **Fuchsia**.
- Close a **Short** if it turns **Aqua**.
- Or close on Fuchsia Diamonds ♦ (exhaustion / local top or bottom).

ILT® · ALL RIGHTS RESERVED 2026

Set it & forget it.

The habit that keeps you profitable without burning out. The market tells **you** when to look.

Right-click **ILT® V1 2026** → *Add alert* → condition **GCL < 4** (Value, Less Than). Set it on each timeframe you trade.

> 💡 You get notified — app + email — the moment a 💎 setup forms. Check your dashboard once a day. The alerts handle the rest.

Low	15m · 1H · 2H · 3H · 4H
Mid	5H · 6H · 8H · 10H · 12H · 23H · D
High	2D · 3D · 5D · 6D · W

ILT® · ALL RIGHTS RESERVED 2026

PART 2 — THE METHOD

The golden rule: Multi-Timeframe.

Read this twice. It's the core of everything.

- **Always trade in the direction of the higher timeframes (HTF).**
- What you see on lowtime frames is **WEAKER** than what you see on high timeframes.
- More aligned 💎 **alerts** across timeframes = a stronger, cleaner move.

WHEN TO TRADE

GCL has reset (low level / near the blue box) on most low & mid timeframes — ideally with 💎 alerts stacking up.

WHEN TO SIT OUT

GCL has a **negative slope on high time frames** → messy, deceptive moves. Wait, or trade tiny & fast.

💎 on the **Daily & above** → expect a **significant** top/bottom.

💎 only on low TFs → just a **local** one.

ILT® · ALL RIGHTS RESERVED 2026

ILT® V1 in depth.

- **GCL** (Gradient Colored Line)— the main line. Reset low = loading up. Negative slope high = exhausted.
- **CL** (Colored Line) — your direction: Aqua = long bias, Fuchsia =short bias.
- **Cross Line** — your reference level.
- **Aqua Area / Blue Box** — the reset / accumulation zone.

AVOIDING SIDEWAYS MARKETS

A GCL with a **positive slope from a low level** — inside the Blue Box, across multiple TFs — is the optimal setup.

A **negative slope**, especially below the Cross Line, signals a sideways phase. Always check several timeframes before trusting a signal.

💎 **Aqua Diamonds**= potential entry. ♦ **Fuchsia Diamonds**= exhaustion / local top or bottom.

ILT® · ALL RIGHTS RESERVED 2026

ILT® 2.0 in depth.

The upgrade: ILT®2.0 merges CL and GCL to separate **real moves from fakes.**

- **CL2** — oscillates above/below the 0 Line. Above = bullish, below = bearish.
- **TL2** — smoothed CL2. Shows trend direction & strength.

ZONES

Risky Zone (≈ +27/+28.5) = potential top ⟶ short.
Safe Zone (≈ −27/−28.5) = potential bottom ⟶ long.

SIGNALS

- **LONG** → CL2 crosses **above** TL2 (ideally TL2 above 0).
- **SHORT** → CL2 crosses **below** TL2 (ideally TL2 below 0).
- **Take profit**→ CL2 crosses back through TL2 the other way.

Catching exact tops & bottoms: watch 15m / 1H / 4H *and* confirm with HTF (4H / 12H / Daily). Enter when both align in/near the same zone.
Bonus: check divergences on **ILT® 2+**.

ILT® · ALL RIGHTS RESERVED 2026

ILT®

ILT 2.0

ILT® · ALL RIGHTS RESERVED 2026

V1 vs 2.0 & risk management.

ILT® V1
Enters **after** a sideways phase, right before a major move. Catches the wave.

ILT® 2.0
Pinpoints the **exact** extremes. Sniper entries & accumulation.

Best
Combine both. They confirm each other → the strongest trades.

EASY RISK MANAGEMENT

- When 3–5 timeframes align, place your stop just **above the last local top** (short) or **below the last local bottom** (long).
- **Don't fear a stop-out.** Re-enter on reset — the real move pays for the small losses.
- **Accumulate** near the zones (15m/1H/4H) when HTF confirms a major extreme. 🔑 Key S/R levels: **1H · 4H · 3D.**

ILT® · ALL RIGHTS RESERVED 2026

PART 3 — MASTERY

Going further.

ADD-ON · MTF TREND LINES

Automatic resistance & support. Solid = higher-term, dotted = shorter-term.

ILT® 2+

Divergences + Bull/Bear Control Zones + a "Last Divergence" dashboard column. Confirms tops/bottoms.

📡 ILT® GCL SCANNER

Scan your **entire watchlist** across Daily / Weekly / Monthly to find 💎 setups on **hundreds of assets at once.**
One scan = you know where the next opportunities are. Included in your membership — add it from the Pine Screener.

ILT® · ALL RIGHTS RESERVED 2026

Trading wisdom: less is more.

The traders who win with ILT® long-term all do the same things.

- **Master one chart.** Depth beats breadth — know your asset across all timeframes.
- **Fewer trades, bigger results.** Not every day is a setup day. Patience cuts risk and stress.
- **Trust your analysis, not the crowd.** The best results often come from tuning out the noise.
- **Turn the rules into instinct.** Practise reading tops & bottoms until it's automatic.

Quality over quantity. Protect your capital, and the outsized moves will find you.

ILT® · ALL RIGHTS RESERVED 2026

Cheat sheet — keep & print

GOLDEN RULES

Trade with the HTF trend · More aligned alerts = stronger move · LTF is weaker than HTF · Avoid GCL negative slope on HTF.

ILT® 2.0

Risky Zone (>27) = top ⟶ SHORT · Safe Zone (<–27) = bottom ⟶ LONG · CL2 crosses TL2 = signal.

ILT® V1

💎 Aqua = entry ·
♦️ Fuchsia = exhaustion.

GCL positive slope + above Cross Line
⟶ LONG if CL aqua / SHORT if CL fuchsia.

RISK & ALERTS

Stop above last top / below last bottom · Don't fear stop-outs · Too many trades = more risk.
Alerts — V1: GCL < 4 · 2.0: CL2 crossing ±27/28.5.

KEY PRINCIPLE — What you see on LTF is WEAKER than what you see on HTF.
